PROFESSIONAL SUMMARY

DevOps Engineer with 10+ years of experience across Cloud Infrastructure and On-Premises Data Centers. Specializing in GitOps practices, Infrastructure as Code (IaC), and automated CI/CD pipelines to drive faster, safer, and highly resilient software delivery.

Currently managing public cloud environments using Terraform/OpenTofu, ArgoCD, and Git-driven pipelines to ensure end-to-end traceability, application performance, and security. Experienced in orchestrating complex CI/CD migrations (e.g., Bamboo to GitHub Actions) and developing custom internal platform tools using Python to streamline infrastructure operations.

CORE COMPETENCIES

- **Cloud & DevOps:** AWS, Azure, Terraform, OpenTofu, ArgoCD, GitOps, Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Bamboo, Spinnaker, GitLab CI, Helm
- **Development & Automation:** Python (Internal Tooling & Platform Engineering), Bash Scripting
- **Containers & Platforms:** Red Hat OpenShift, VMware vSphere, Sonatype Nexus
- **Infrastructure & Middleware:** Linux (RHEL, Ubuntu), JBoss EAP, Apache Kafka, Redis, System Administration
- **Databases:** Oracle Database, Microsoft SQL Server

PROFESSIONAL EXPERIENCE

Trustly – DevOps Engineer

Jul 2023 – Present | Vitória, Espírito Santo, Brazil (Remote/On-site)

- Manage public cloud infrastructure operations focused on reliability, application performance, and high availability.
- Implement GitOps workflows utilizing Terraform/OpenTofu, ArgoCD, and Git to enable fully traceable and automated deployments.
- Lead the engineering initiative to migrate CI/CD pipelines from Bamboo to GitHub Actions, while maintaining and optimizing legacy workflows in Spinnaker.
- Develop internal CLI and automation tools in Python to internalize and streamline infrastructure management tasks.

Grupo Águia Branca – 9 yrs 10 mos (Total)

Cariacica, Espírito Santo, Brazil

Infrastructure Team Lead (Production & Operations) | *Jan 2022 – Jul 2023*

- Led infrastructure operations for critical business systems, maintaining 99.9%+ uptime for 200+ production applications.
- Managed the implementation of Red Hat OpenShift and containerized application environments.

- Administered core internal platform engineering tools including GitLab (repository and CI/CD) and Sonatype Nexus (artifact management).
- Managed high-availability enterprise stacks with JBoss EAP, Kafka, Redis, Oracle, and SQL Server databases.

Infrastructure Analyst (Production) | *Feb 2018 – Jan 2022*

- Ensured high availability and performance for 200+ production applications, focusing on mission-critical ticketing and sales systems.
- Administered middleware platforms including JBoss EAP, Kafka, and Redis, while managing SQL Server and Oracle databases.
- Participated in key integration projects for enterprise APIs and backend services.

Infrastructure Support Analyst | *Sep 2016 – Feb 2018*

- Managed core IT infrastructure operations, including Exchange, Windows Server, VMware vSphere, ADDS, DNS, and DHCP environments.
- Handled troubleshooting and maintenance for File Servers, Remote Desktop Apps, and Citrix XenApp services.

IT Lab Technician | *Oct 2013 – Sep 2016*

- Provided direct technical support for workstations, hardware, and mobile devices across multiple business departments.

EDUCATION

- **MBA in Cloud Computing & DevOps** – Impacta Tecnologia (2021 – 2023)
- **Bachelor's Degree in Computer Science** – FAESA (2013 – 2017)
- **Associate Degree in Industrial Automation** – Senai Vitória (2010 – 2012)

FEATURED CERTIFICATIONS

- **GitHub Actions** – GitHub
- **AWS Certified Cloud Practitioner** – Amazon Web Services
- **Uncomplicating Docker** – LINUXtips
- **Mutirão DevOps / GitOps** – LINUXtips
- **Claude Academy (AI Fluency & Tooling)** – Anthropic
- **Administering / Provisioning SQL Server Databases** – Microsoft
- **ITIL Foundation in IT Service Management**

LANGUAGES

- **Portuguese:** Native
- **English:** Professional Working Proficiency
